

From nanosafety research to operational tools for the nanotechnology industry: the EU projects NanoMILE, NanoFASE, NanoReg2, NanoSolutions, Sun, CaLIBRAte

<u>Benoît Hazebrouck</u> (EU-VRi), Emeric Fréjafon (INERIS), Eva Valsami-Jones (UoB), Claus Svendsen (NERC), Elina Drakvik & Kai Savolainen (FIOH), Sean Kelly (NIA), Danail Hristozov (Uni of Venice), Keld Alstrup Jensen (NRCWE) and the NanoSafety Cluster

Industrial Technologies 2016 – Amsterdam – 22.06.2016

Workshop Nanosafety: From research to implementation of Risk Management and Safe Innovation in the nanotechnology industry

Contact: Benoît Hazebrouck, bh@eu-vri.eu, +49 151 6368 3536

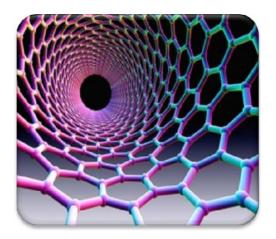

Introduction: NanoSafety research & Industry

Since 2002 (FP6):

~ 50 EC research projects

~ 150 M€ EC funding

Hundreds of research teams

Goals: Understand, Support innovation & competitiveness, serve society

What comes out of it for the nano-industry*?

Now? Later when?

How to remain efficiently updated?

How to influence?

Here: insight

- 1. Overview of impacts
- 2. Projects: outputs
- 3. Perspectives / you

^{*} Producers of nanos or of nano-containing prducts

Overview of impacts for nano-industry – All projects

For core business		On context On tools	
	Safer nanos / Products Safer sites (emissions)	- Stabilized regulation (REACH, GHS,)	- Testing protocols & equipment
	Demonstration of safety	 Public confidence on impact of new nanos → Sustainable innovation & economic development 	OSH rules+ Protocols for synthesis of nanos

Ex. of key exploitable outputs:

2013 –2017, 13 M€, 28 partners (2 US): Understanding mechanisms of interactions of nanos with living systems and the environment (aging, tox, ecotox)

Exploitable output	Examples	
Protocols for aging/ tox/ecotox	 Maternal transfer in fish and isopods (new) High Throughput screening assays Clothe in washing machine and effluents 	R&D
Advanced equipment for characterization / testing	nano-titrator (Malvern)Exposure station at the air/liquid interface (Vitrocell)	R&D / demo
Integrated datasets on characteriz°, tox, ecotox	 Interconnectable database for future data mining Comparison to models 	R&D
Model: QSAR/QPAR	SoftwareUser-friendly simplified version online	R&D to market
Grouping / classification Risk Assessment Safe design	 Ranking of existing nanos Guidance Decision tool for cost-benefit analysis 	R&D / demo

Ex. of Tools and services developed in

nanomile.eu-vri.eu/home.aspx?lan=230&tab=2481&tpag=1475

Automated exposure station at the air/liquid interface

- Exposes lung cells to nanoparticles in air
- Simulates human exposure through **inhalation**
- •Long term goal: replace experiments on animals

Ex. of key exploitable outputs:

2013 –2017, 13,8 M€, 36 partners: Determine the "biological identity" of nanos and provide a means to develop a safety classification of nanos based on an understanding of their interactions with living organisms

Exploitable results	Description	
Nanosafety Classifier	See next slide	R&D / demo
Software for Life Cycle Assessment (LCA)	Software and data on human and ecotoxicological properties	R&D / demo
Screening platforms	'High-throughput' technique: • huge numbers of tests at once	R&D/ demo

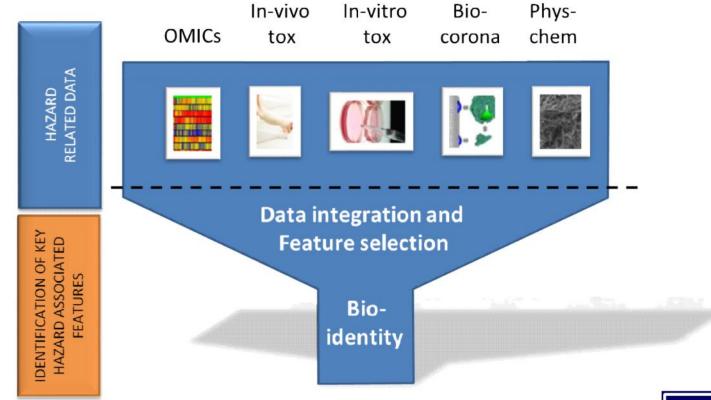

Tools and services developed in

NanoSafety Classifier

Computational tool:

- predicts health and environmental impacts
- based on characteristics and behaviour

Ex. of key exploitable outputs:

2015 –2019, 11,3 M€, 41 partners (7 non EU): Nanomaterial fate and speciation in the environment

Exploitable output	· · · · · · · · · · · · · · · · · · ·	
Models	 Operationalised version of SimpleBox4Nano Individual processes: waste streams, air, soil, water/ sediment 	Demo / market (EUSES, REACH)
Protocols	 Dissolution, attachment, aggregation, leachate Quantification of nanos and their transformation in environmental samples 	R&D to market
Data	 Pathway analysis for a range products & industrial sectors Emission and release: several industrial sectors Form of nanos in environmental media 	Demo / market
Risk Assessment Safe design	 Approach to group nanos for fate assessment, in order to reduce quantity of individual product assessments 	R&D / demo

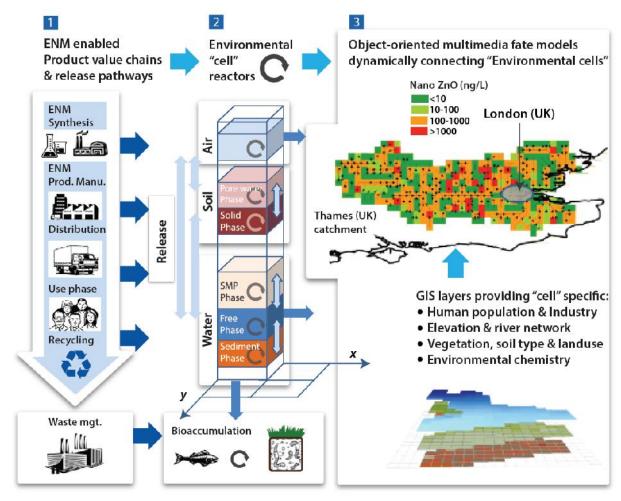

Ex. of Tools and services developed

"Clickable" exposure assessment framework

www.nanofase.eu

Ex. of key exploitable outputs: Others

Project	Duration	Exploitable output	Stage
Nano alid W Nanomaterials	2011-2015	Nano- protocols for characterization, tox, ecotox	Demo to market
NAN SREG	2013 -2016	Recommendations of nano-adaptations of OECD Guidelines for the Testing of Chemicals	Demo to market
SUN	2013-2017	Software System for integrated Risk Assessment and Management	Demo / market
NanoReg ²	2015-2018	Safe by Design principles based on regulatory driven tools and processes	Demo / market
calibrate nano risk governance	2016-2019	Risk governance framework for assessment and management of risks	R&D / demo

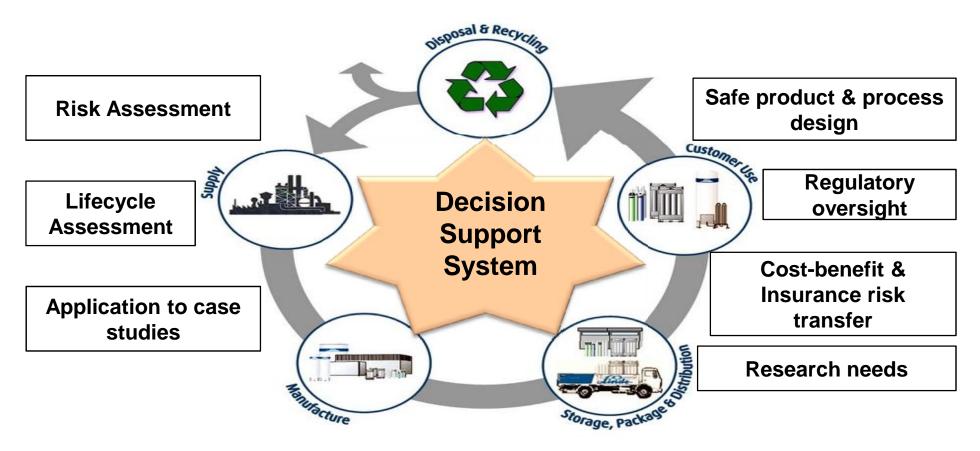

Sustainable Nanotechnologies Project

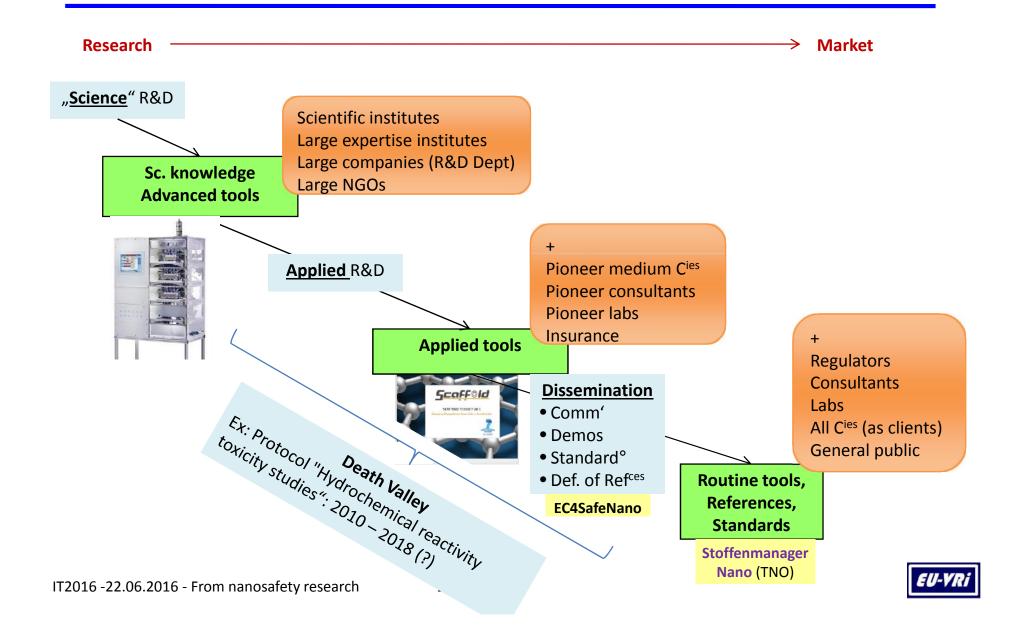

SUN Decision Support System

Software System for Risk Assessment and Management of Manufactured Nanomaterials

Different stages, different users

So, for you now...

Remain informed:

- NanoSafety Cluster: www.nanosafetycluster.eu
 - Newsletter (register!)
 - Compendium of projects: 8 p/project, yearly
- + Platform "NanoFutures": www.nanofutures.info
- + Project websites [e.g. find theses slides on www.nanomile.eu, www.nanofase.eu,...]

Integrate knowledge & tools in your approach/tools/policy:

- Mechanisms, data, risk assessment, risk management, safety-by-design...
- Internally or through service providers

Participate to R&D projects: Partner, Advisory board, Stakeholder group

Define a future European Centre for nanosafety expertise - EC4SafeNano

Acknowledgement

The research projects

NanoMILE, NanoSolutions, NanoFASE, NanoReg2, Sun and CaLIBRAte

have received funding from the European Community's Seventh Framework Programme (FP7/2007-2013) and Horizon 2020 Framework Programme

under grant agreements numbers 310451, 309329, 646002, 280713, 604305 and 686239 respectively.
